

Abstracts should be submitted electronically using the online abstract submission form at <http://geoscience-meeting.scnatweb.ch/sgm2009>

### **Deadline**

The abstract submission deadline is September 4<sup>th</sup> 2009

### **Language**

Abstracts should preferably be submitted in English. They can however also be submitted in one of the four swiss national languages.

### **Abstract Size**

Your abstract should not exceed 2 pages in the format of the model abstract including optional figures, captions and references. Please download the abstract model, modify it by pasting your text into it, and consider the following points when writing your abstract.

### **Title**

Please capitalise Names only.

### **Author(s)**

Please list for each author in the following order: Family name, full first name, affiliation, address, e-mail address.

### **Text**

Please use the predefined formats for:

Abstract title

Authors

Addresses of authors

Body text

Bullet lists

Abstract illustrations

Abstract References

Do not "beautify" the abstract, which means: no right justification or other fancy layouting. Thank you!

Otherwise, use Arial 12, single spacing, italics and scientific notations according to standard international rules. Margins are given by the model abstract. The abstract file should be submitted in .rtf or .doc format. In addition, we recommend the submission of a .pdf file (text only) to enable us to check for correct reproduction of special characters.

## References

Please put optional references at the end of the abstract text. The maximum of cited references should not exceed 5

## In text citation

References should be made giving the author's name with the year of publication.

Examples: (Laubscher 1973, 1975; Meyer 1930) or ..... as Trümpy (1969, Fig.2) stated.... When reference is made to a work by two authors «&» (without a comma before «&» ) should be used; by three or more authors, the first author followed by «et al.» is cited.

## Reference list

The list of references has to be compiled alphabetically in the following standard manner:

Arthaud, F. & Matte P. 1975: Les décrochements tardi-hercyniens du sud ouest de l'Europe. Géometrie et essai de reconstruction des conditions de la déformation. *Tectonophysics* 25, 139–171.

Arthaud, F. 1977: Late Paleozoic strike-slip faulting in southern Europe and northern Africa: result of a right-lateral shear zone between the Appalachians and the Urals. *Bull Geol. Soc. Amer.* 88, 1305–1320.

Blüm, W. 1989: Faziesanalyse im Rotliegenden des Nordschweizer Permokarbon-Trogs (Hochrhein-Region zwischen Basel und Laufenburg). *Eclogae geol. Helv.* 82, 455–489.

James, N. 1983: Reef environment. In: *Carbonate Depositional Environments* (Ed. by Scholle, P.A., Bebout, D.G. & Moore, C.H.). *Amer. Assoc. Petroleum Geol.* 33, 346–440. Tables, drawings and photographs

## Figures, Photographs and tables

We recommend to submit tables, drawings and photographs in pixelised form (e.g. .tif/ highest quality .jpg etc.). Adobe Illustrator files are accepted for vectorised graphics and tables. Please make sure that you scale your illustration to printing size (maximum 25cm x 16cm). Please check that your figures and included text are readable at this size (avoid text smaller than 10pts). We recommend a resolution of 300 dpi for pictures, and a maximum resolution of 600dpi for graphics.

Symbols and patterns must be lettered directly (not coded by numbers!). Bar scales are preferred for photographs. Mention the name of the photographer or the source in the caption.

## Captions

Please put captions to optional figures, tables or photographs at the end of your abstract text file (after the references, see model abstract).

## Naming Conventions

Please make sure that the file names are in the following form: surname\_name (e.g. Emma Bovary: bovary\_emma.doc, bovary\_emma1.jpg; bovary\_emma2.jpg etc.).
